What is Well-Pure?

Well-Pure is an air sterilization device that eliminates germs, bacteria and viruses in the air in closed areas with the help of the UVC lamp and air filter it contains. It provides 99.99% sterilization. It has an ergonomic design that is portable and easy to use which does not harm human health.

GENERAL FEATURES

UVC Technology

- UVC light can kill all kinds of microorganisms due to its short wavelength of 200-280 nm and its high energy. Well-Pure ensures the destruction of bacteria and viruses in indoor areas thanks to the UVC lamps it contains.

UVC Technology

- Ultraviolet rays safely sterilize your environment without the addition of any chemicals.

Usage Areas

- Hotels, Hospitals, Public Transport Vehicles, Shopping Malls, Business Centers / Offices, Banks, Universities / Schools,

Usage Areas

- Factories, Elderly Care Centers, Waiting Rooms, Cinemas / Theaters, Gyms, Restaurants / Cafes, Houses

Well-Pure;

Takes the dirty air in and cleans it. Then, it only releases the cleaned air back to the indoor environment it is used in.

Well-Pure is designed and manufactured by using advanced engineering. The device, which works within the framework of thermodynamic principles, does not take the cleaned air back in and it absorbs&cleans the microbiologically polluted air until the entire closed area is cleaned.

On / Off Button

- Well-Pure operates automatically for 8 hours when the on button is pressed. It turns itself off when the set time is up. When you want it to operate in a shorter period of time, you can press the off button.

Reliable in terms of Human Health

- Well-Pure is designed in a way that protects the user from direct eye contact with the UVC light. Because of that, you can activate the device and be present in the area that the device is working.

Ergonomic Design

- The design, which is reliable in terms of human health, is convenient for you to use it in your house as well as being used in many other institutions.

99.99% Sterilizasyon

- The device has the ability to sterilize the air in closed areas 99.99%.

How to use Well-Pure?

Take it to the indoor area you want to operate.

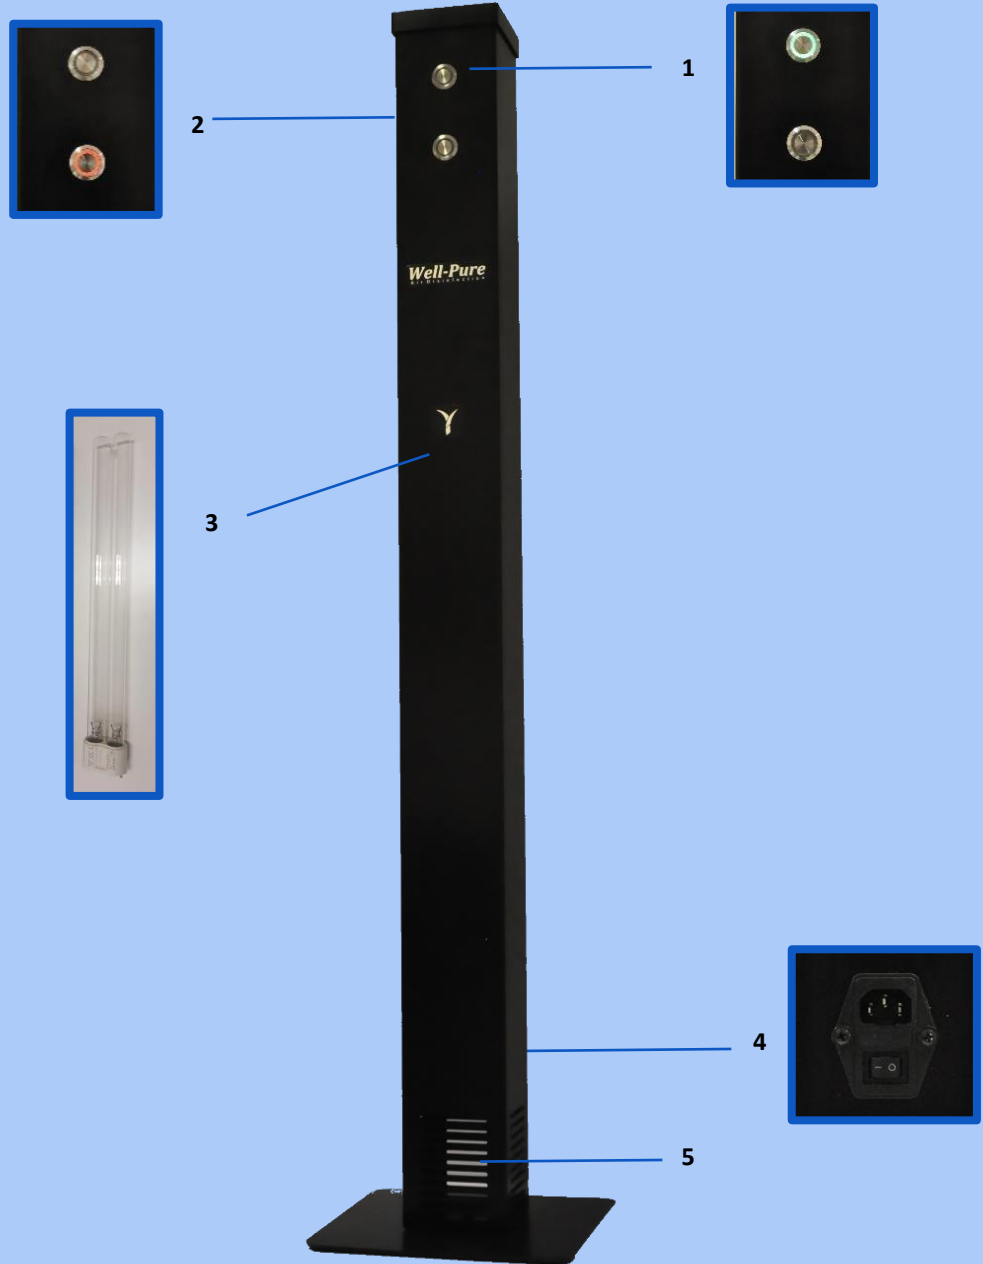

Plug it in and activate the power button on the back of the product.

Turn on the product by pressing the on button in front of the device.

Well-Pure will shut down automatically after the runtime has expired. If you want to turn it off in a shorter time, switch the device to off position by pressing the off button in the front of the device.

TECHNICAL FEATURES

WELL-PURE Air Disinfection

**Cleaning
Method:** UV-C
Technology

Lamp:
Philips TUV-PL-L
Germicidal

**Operating
Frequency:**
50-60 Hz

Wave Length:
254 nm

**UV-C Lamp
Power:**
24 W

Input Voltage:
220-230 V

**Led Life
(hour):**
9000

Control System:
Time Adjustable

**Operating
Mode:**
On-Off

**Assembly
System:**
Portable

TECHNICAL FEATURES

Color:
Black

**Air
Cleaning
Capacity:**
8m³/Hour

**Size
(mm):**
1160x106
x106

**Sphere of
Influence:**
60 m³

WELL-PURE

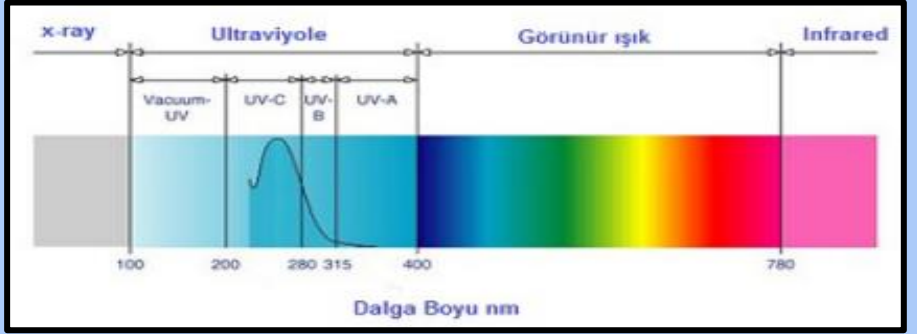

Air Disinfection

SAFETY WARNINGS

- Do not expose yourself to direct eye contact with UVC light by disassembling the device.
- Avoid your skin to have direct contact with UVC light.
- If the power cord and / or plug is damaged, do not plug in and use the device.
- Call technical service if it is necessary to intervene with UVC lamps.
- Avoid children coming into contact with the device without supervision.
- Do not attempt to open the top cover of the product.

UV-C rays are harmful to human skin and eyes as they have a wavelength of 200-280 nm. Avoid direct contact with the UV-C lamps inside the device.
